MODULE 1

TRAVEL TRANSPORT & LEISURE

SESSION 1: INTRODUCTION

Session 1: Introduction Class: Intro to TOEIC & Travel Anecdotes

Session one will be an introductory session during which we will introduce ourselves and introduce the module subject of travel, transport and leisure.

We will also have a brief introduction to the TOEIC test (which you will prepare for throughout semesters 1 and 2 in your own time. The test will take place at the beginning of semester 3 at ENAC.

DDRS: Areas Covered

All classes will be associated with DDRS areas. The DDRS areas will be highlighted at the beginning of each class document.

DDRS Definition: Le Référentiel National DD&RS de l'Enseignement Supérieur et de la Recherche (Label DD&RS) structure les engagements écologiques, sociétaux et éthiques des établissements et des grands projets de transport selon 5 axes stratégiques et leurs domaines transversaux d'application.

Session 1 - Lesson Plan

- Introductions
- TOEIC: Explanations, preparation and strategy
- Travel anecdotes
- Grammar point
- Debrief

Objectives

By the end of this session, students will be able to:

Understand the TOEIC Exam:

Understand the structure, scoring system, and strategic pacing of the TOEIC Listening & Reading test, shifting from general language study to targeted exam technique.
Master High-Frequency Travel & Professional Collocations.

Identify and correctly utilize essential B2/C1-level travel collocations and idioms in professional and conversational contexts.

Produce Advanced Narrative Structures:

Review and accurately apply narrative tenses (Past Simple vs. Past Continuous) and inversion structures (e.g., *Hardly had I...*) to enhance complexity in speaking and writing.

Integrate DDRS Principles into Professional Travel:

Connect global travel scenarios to concepts of sustainable mobility, cultural respect, and responsible tourism.

Prepare for the Class 5 Formative Evaluation (FE):

Understand the exact assessment criteria—vocabulary, fluency, grammar, and TOEIC-readiness—for the upcoming 30-minute graded speaking activity that determines their "Go / No-Go" status.

Formative Evaluation (FE) Specification: Module 1 Tutorial

Evaluation Overview

The Module 1 Formative Evaluation is a **30-minute face-to-face paired tutorial** conducted during Session 5. Working in pairs, students will:

Design an eco-friendly holiday itinerary or Compare two cities with different tourism policies.

The tutorial evaluates both real-time communicative competence (fluency, DDRS lexical range, grammatical control, and pronunciation) and individual engagement with continuous learning tools, specifically evidence of independent TOEIC practice recorded in their study logs or e-Campus portfolios.

The evaluation results in an individual mark out of **20 points**, which contributes directly to each student's semester 1 formative assessment and final grade (GO / NO GO).

Pedagogical Objectives

By the end of this evaluation, each candidate will have demonstrated the ability to:

Deploy B2-Level DDRS Lexis in Context: Naturally integrate core terminology and collocations covered in Weeks 1–4 (e.g., *modal shift, lifecycle assessment, carrying capacity, spatial saturation, tourist levy, greenwashing detection, seasonal tapering*) into an authentic technical presentation.

Maintain Spontaneous Spoken Interaction & Fluency: Speak fluently without excessive hesitation or reliance on scripted notes, handle impromptu counter-arguments from the tutor, manage pair turn-taking, and balance technical depth with communicative clarity.

Demonstrate Advanced Grammatical Accuracy & Complexity: Accurately produce target syntactic structures practiced during the module, including causative forms (*have/make/require*), formal concessive linkers (*despite, notwithstanding, whereas*), inversion patterns (*not only did we...*), and complex conditionals.

Ensure Phonetic Precision: Accurately place word stress on high-frequency polysyllabic cognates (*ca-PA-ci-ty, in-FRA-struc-ture, RE-gu-la-to-ry, e-CO-sys-tem*) and maintain natural sentence rhythm when explaining technical concepts.

Provide Evidence of Autonomous TOEIC Preparation: Present an up-to-date physical or digital portfolio demonstrating continuous practice (e.g., error logs, Part 5/6 timing drills, vocabulary tracking sheets, or mock test results).

Stage 1: Continuous Work & TOEIC Verification (5 mins)

- The tutor inspects both students' e-Campus study trackers and personal error logs.
- Each student briefly explains one recurring error pattern they addressed during independent study (e.g., causative patterns, prepositional traps in Part 5, or pacing on Part 7 texts).

Stage 2: Paired Project Presentation (10 mins)

- The pair delivers a pitch (maximum 10 minutes total, evenly split between partners)

  Subject: Design an eco-friendly holiday itinerary or Compare two cities with different tourism policies.

- **Delivery Constraint:** Slides or visual aids may contain only diagrams, maps, or data figures; no scripted paragraphs or verbatim reading is permitted.

Stage 3: Cross-Examination & Technical Defense (10 mins)

- The tutor asks questions leading to further discussion. *Focus is placed on natural turn-taking, polite disagreement, concession, and spontaneous lexical retrieval.*

Stage 4: Feedback & Scoring (5 mins)

- The tutor provides verbal feedback on strengths, phonetic errors, and lexical variety, then records the score.

Session 1 Part 1 Getting Started: Icebreaker Activity

Activity: The Professional Two Truths & One Goal

Take 1 minute to write down three statements about yourself.

Two Truths: Share facts related to your work, studies, or daily habits (e.g., *"I manage social media campaigns for a tech startup,"* or *"I have never drunk a cup of coffee in my life"*).

One Goal: State a specific objective regarding your English proficiency or career future (e.g., *"I need a TOEIC score of 800 to transfer to our company's international office"*).

How to play: Working with a partner or in your small group, share your three statements. Your peers will try to guess which statement is your professional goal and which two are facts about your life.

Session 1 Part 2 TOEIC Diagnostic & Strategy:

Brief introduction to the structure of the TOEIC exam.

The TOEIC Test Structure

The TOEIC Listening and Reading test is a paper-and-pencil multiple-choice assessment that takes approximately **2 hours and 30 minutes** in total (including administrative time). It is divided into two main sections:

Section I: Listening (approx. 45 minutes / 100 questions)

Part 1: Photographs (6 questions) – Choose the statement that best describes a picture.

Part 2: Question-Response (25 questions) – Listen to a question and three potential responses.

Part 3: Conversations (39 questions) – Listen to short dialogues and answer comprehension questions.

Part 4: Talks (30 questions) – Listen to short monologues (announcements, talks) and answer questions.

Section II: Reading (75 minutes / 100 questions)

Part 5: Incomplete Sentences (30 questions) – Fill in the blanks with grammar or vocabulary.

Part 6: Text Completion (16 questions) – Fill in missing words/phrases within longer reading passages.

Part 7: Reading Comprehension (54 questions) – Read single or multiple-passage texts (emails, articles, ads) and answer questions.

How the TOEIC is Graded

Unlike academic tests where you might aim for a percentage out of 100, the TOEIC uses a **scaled scoring system**:

Score Range: Each section (Listening and Reading) is scored on a scale from **5 to 495 points**.

Total Score: Combined, the total score ranges from **10 to 990 points**. There is no penalty for guessing wrong, so you should always answer every question.

CEFR Alignment: Scores are often mapped to the Common European Framework of Reference for Languages (CEFR), typically ranging from A1 (Beginner) to C1/C2 (Advanced/Professional proficiency).

Examples of TOEIC questions

Listening Part 3 (Short Conversation)

Audio Context: Two colleagues talking in an office.

> *Man:* "Excuse me, Sarah. Do you know if the catering order for tomorrow's client lunch has been finalized yet? The supplier called to confirm headcount."
>
> *Woman:* "I was supposed to do that this morning, but I got pulled into an urgent budget meeting with the director. Let me check my notes... Ah, I have the draft right here, but I haven't hit send."
>
> *Man:* "No worries. Just make sure you update the dietary restrictions for Mr. Vance before you submit it."

Question: What does the woman imply she needs to do?

Options:

(A) Cancel a client lunch

(B) Review a budget report with the director

(C) Finalize and send a catering order

(D) Update a meeting schedule

Answer: (C)

B2 Insight: This tests your ability to infer intent and track multi-step workplace tasks rather than just listening for isolated keywords.

Reading Part 5 (Incomplete Sentences - Vocabulary/Grammar)

Prompt: "To ensure that all departments meet the end-of-year targets, management has decided to _____ the approval process for new software purchases."

Options:

(A) accelerate

(B) accelerate's *(or alternative distractor like acceleration)*

(C) accelerated

(D) accelerating

Answer: (A) accelerate

B2 Insight: TOEIC Part 5 frequently tests your knowledge of grammatical structure after infinitive markers (*to + verb*), combined with professional business vocabulary (like streamlining or speeding up a corporate process).

Reading Part 7 (Reading Comprehension - Text Message Chain / Multi-passage style)

Context (Text Message Chain):

> *10:15 AM - Mark Chen:* "Hi team, are we still on track to pitch the marketing strategy to Apex Corp this Thursday? I'm putting the final slides together now."
>
> *10:18 AM - Elena Rostova:* "The slides look great, Mark, but I just heard from facilities. The main conference room is undergoing unexpected plumbing repairs, so we won't be able to use the projector there."
>
> *10:20 AM - David Kim:* "Don't panic. I already booked Room 3B as a backup. It has a smart screen, so Mark's presentation format will work fine."

Question: What is David Kim suggesting?

Options:

> (A) Rescheduling the pitch meeting for next week
>
> (B) Using an alternative location for the presentation
>
> (C) Fixing the plumbing issue in the main conference room
>
> (D) Updating the slides to fit a different screen format

Answer: (B)

B2 Insight: Part 7 often uses modern workplace communication formats (like chat logs or email chains) and requires you to track problem-solving across multiple speakers.

Examples of common pitfalls:

Falling for "Sound-Alikes" in Listening: In Parts 1–4, test-makers often use words in the incorrect answer choices that sound very similar to words heard in the audio (e.g., hearing *report* and choosing an option containing *airport* or *support*).

Overspending Time on Part 5: Spending too much time agonizing over a single grammar or vocabulary question in Part 5, which leaves you rushed and unable to finish the lengthy Reading Comprehension texts in Part 7.

Ignoring Context and Literal Translation: Translating sentences word-for-word instead of looking at contextual clues (especially in Part 5 vocabulary and Part 7 inference questions), leading to unnatural word choices or misunderstood idioms.

Preparation Strategies

Active Vocabulary Log: Keep a notebook specifically for business terms, phrasal verbs, and common workplace collocations (e.g., *launch a product*, *meet a deadline*) encountered during practice tests.

Simulated Full-Length Practice Tests: Take at least 2 or 3 full-length, timed practice tests under actual exam conditions to build the mental stamina required for the full 2.5-hour duration.

Targeted Error Analysis: Do not just score your practice tests; maintain an error log detailing *why* you got a question wrong (e.g., misheard audio, grammar rule gap, or time pressure) so you can fix specific weaknesses.

Time management strategies

The "Pacing Checkpoint" for Reading: Aim to finish Parts 5 and 6 (46 questions total) within **20 to 22 minutes**, leaving yourself a solid 50 to 53 minutes to tackle the 54 questions in Part 7.

The "Never Leave Blanks" Rule: Because there is **no penalty for guessing** on the TOEIC, never leave an answer blank. If you are running out of time, quickly bubble in a guess for remaining questions before the proctor calls time.

Move On Immediately (The 10-Second Rule): If you are unsure of a Listening question (Parts 2, 3, or 4), guess instantly and force your eyes/mind to look at the next set of questions. Lingering over a missed question causes you to miss the *next* audio prompt.

Session 1 Part 3 Warm-up & Vocabulary Builder:

Travel Idioms & Collocations (20 mins): Introduce travel and mobility vocabulary (e.g., *off the beaten track, itinerary, layover, commute*).

Examples of travel collocations:

Travel Collocations

Book a flight / hotel *(Verb + Noun)*

Meaning: To reserve travel accommodation or transportation.

Example: *"Make sure you **book your flight** well in advance to secure a reasonable price."*

Board a plane / train *(Verb + Noun)*

Meaning: To get onto an aircraft or railway carriage to begin travel.

Example: *"Passengers are kindly requested to **board the plane** through Gate 24."*

Check in for a flight *(Verb Phrase + Preposition)*

Meaning: To register your arrival at a hotel or confirm your presence and get a boarding pass at an airport.

Example: *"You can **check in for your flight** online 24 hours before departure."*

Clear customs / security *(Verb + Noun)*

Meaning: To pass through official checkpoints at a border or airport.

Example: *"It took us nearly an hour to **clear customs** after landing at the international terminal."*

Miss a flight / connection *(Verb + Noun)*

Meaning: To arrive too late to board a scheduled vehicle.

Example: *"Heavy traffic on the ring road meant we nearly **missed our flight**."*

Extend a stay *(Verb + Noun)*

Meaning: To prolong the duration of a hotel booking or trip.

Example: *"The conference was so productive that I decided to **extend my stay** by an extra two days."*

A window / aisle seat *(Adjective + Noun)*

Meaning: Specific types of passenger seats on a plane, train, or bus.

Example: *"I always request **an aisle seat** on long-haul flights so I can stretch my legs easily."*

A round-trip ticket *(Adjective + Noun)*

Meaning: A pass or fare for a journey to a place and back again.

Example: *"It is usually much cheaper to buy **a round-trip ticket** than two separate one-way fares."*

Hand luggage / Carry-on baggage *(Adjective + Noun)*

Meaning: Small bags that passengers are allowed to keep with them in the cabin.

Example: *"Please ensure all liquids in your **hand luggage** comply with airport security regulations."*

Peak travel season *(Adjective + Noun)*

Meaning: The time of year when a high volume of people travel for holidays.

Example: *"Prices for accommodation double if you visit the coast during **peak travel season**."*

10 Common Travel Idioms

To hit the road

Meaning: To set off on a journey or leave.

Example: *"We've packed all our bags, so let's **hit the road** before the traffic gets heavy."*

To take the scenic route

Meaning: To take a longer, more picturesque way to get somewhere instead of the fastest route.

Example: *"We had plenty of time before check-in, so we decided to **take the scenic route** along the coast."*

To catch the bug (for something)

Meaning: To suddenly develop a strong enthusiasm or passion for something (very often used for travel: *to catch the travel bug*).

Example: *"After visiting Japan last year, she completely **caught the travel bug** and is already planning her next three trips."*

To be in the driver's seat

Meaning: To be in control of a situation, project, or journey.

Example: *"Now that we've finalized the budget and itinerary, I really feel like I'm **in the driver's seat** for this trip."*

To jump on the bandwagon

Meaning: To join a popular trend or activity because everyone else is doing it (often applied to trendy holiday destinations).

DDRS Vocabulary

Développement Durable et Responsabilité Sociétale (*Sustainable Development and Social Responsibility*)

1. Environmental Sustainability (Environnement)

Carbon Footprint Tracking / Reduction: Measuring and mitigating greenhouse gas emissions from flights, ground transport, and hotel stays.

Eco-Certification / Ecolabels: Official certifications for sustainable tourism providers (e.g., *Green Globe, EU Ecolabel, EarthCheck*).

Circular Economy in Hospitality: Reducing single-use plastics, implementing food-waste management, and recycling water systems in resorts and hotels.

Biodiversity Conservation: Tourism management strategies that protect local ecosystems and wildlife habitats from overtourism.

2. Social & Societal Responsibility (Responsabilité Sociétale)

Community-Based Tourism (CBT): Ensuring local communities directly benefit economically and socially from tourism activities rather than external corporations.

Cultural Heritage Preservation: Safeguarding local traditions, historical sites, and indigenous cultures from commercial exploitation or degradation.

Accessible / Inclusive Tourism: Designing travel infrastructure, transport, and attractions that accommodate travelers with disabilities or special needs.

Fair Labor Practices: Ensuring fair wages, safe working conditions, and ethical treatment for hotel, restaurant, and tour-operating staff.

3. Governance & Economic Viability (Gouvernance & Économie)

Sustainable Destination Management: Long-term planning by local authorities to balance tourist influx with resident quality of life (combating overtourism).

Ethical Supply Chain Management: Sourcing local food, materials, and services to support the regional economy and lower transportation emissions (short-circuit distribution).

Transparency and Reporting: Corporate social responsibility (CSR) reporting where travel agencies and airlines disclose their ecological and social impact metrics.

Session 1 Part 4 Activity

Structured Discussion: Travel Anecdotes (30 mins): In pairs or small groups of 3, students share a memorable travel experience or disruption using newly learned vocabulary and narrative past tenses.

Session 1 part 5 Grammar Focus: Narrative Tenses & Complex Structures

Review and practice past simple vs. past continuous and inversion structures (e.g., *Hardly had I arrived when...*) crucial for advanced language production.

Additional Material / Homework

Grammar Practice: Narrative Tenses & Inversions

Exercise 1: Fill in the Blanks

Complete the sentences using the correct form of the verbs in brackets (Past Simple or Past Continuous) or supply the appropriate inversion word where indicated.

While Elena _____ (print) the boarding passes, her colleague _____ (realize) that the passport had been left on the office desk.

Hardly _____ the clients _____ (step) into the conference room when the projector suddenly stopped working.

As the executive _____ (read) through the merger agreement, the legal team _____ (arrive) with the final revisions.

No sooner _____ we _____ (clear) customs than our connecting flight was unexpectedly cancelled.

While the pilot _____ (announce) the turbulence, the flight attendants quickly _____ (secure) the beverage carts.

Not only _____ the train _____ (run) three hours late, but it also missed the scheduled stop at the airport terminal.

Exercise 2: Sentence Transformation

*Rewrite the following sentences starting with the bolded words to create an **inversion structure**, keeping the same meaning.*

I had barely locked the front door when I remembered I forgot my passport.

Rewrite starting with: **Hardly...**

We rarely experience such severe delays during the peak travel season.

Rewrite starting with: **Rarely...**

She not only missed her morning meeting, but she also lost her luggage.

Rewrite starting with: **Not only…**

Answer Key

was printing / realized (Past continuous for the background action interrupted/coinciding with a single past action).

had... stepped (Standard structure for *Hardly had + subject + past participle*).

was reading / arrived (Past continuous for an ongoing action in the past when another action happened).

had... cleared (*No sooner had + subject + past participle*).

was announcing / secured (or *were securing* - background continuous action interrupted or running alongside another).

did... run (Inversion with a past simple verb using *did* because of "Not only" at the beginning).

Hardly had I locked the front door when I remembered I forgot my passport.

Rarely do we experience such severe delays during the peak travel season.

Not only did she miss her morning meeting, but she also lost her luggage.

Session 1 Part 6 Class Debrief & Personal Takeaways

Take 3 minutes to complete this section before you leave.

1. Key Learnings & Review

In one sentence, what was the most important thing you learned today?

_____
_____

2. Future Application (Connecting to your FE / Career)

How will you apply today's vocabulary, grammar, or travel/tourism concepts to your (FE)?

_____
_____

3. Action Plan & Next Steps

What specific homework or preparation do you need to complete before our next session?

_____
_____

4. Questions & Clarifications

Do you have any lingering questions for your teacher about today's material?

_____
_____

MODULE 1

TRAVEL TRANSPORT & LEISURE

SESSION 2

Session 2: The Evolution of Transport & Sustainable Mobility

DDRS: Areas Covered

1: Environmental Transition & Planetary Boundaries: Environnement : Transition Écologique, Décarbonation et Sobriété Énergétique

Transport Focus:

Life-cycle assessment of transport modes across eras (steam, internal combustion, aviation, electrification, hydrogen).

Carbon footprint, atmospheric emissions, non-exhaust emissions, and particulate pollution.

Land use, habitat fragmentation, and ecological disruption caused by transport corridors and infrastructure (canals, railways, motorways, airports).

Shift from energy-dense fossil dependency to low-carbon propulsion, fleet efficiency, and modal shift policies.

2: Societal Equity, Accessibility & Territorial Cohesion: Sociétal & Humain : Accessibilité Universelle, Justice Mobilité et Équité Territoriale

Transport Focus:

Spatial segregation, transport poverty (*précarité mobilité*), and urban-rural connectivity divides resulting from car-centric or flight-centric development.

Public health externalities across history: urban acoustic pollution, air quality crises, and road traffic safety/casualties.

Labor conditions, automation impacts, and just transitions for transport workforce sectors.

3: Economic Viability, Systemic Ethics & Future Governance: Économie Circulaire, Éthique Industrielle et Gouvernance des Systèmes

Transport Focus:

Whole-life costs, resource extraction ethics (e.g., critical raw materials for batteries and electronics vs. fossil supply chains).

Circular economy in fleet maintenance, retrofitting, end-of-life recycling, and scrappage governance.

Policy frameworks, carbon taxation, infrastructure subsidy ethics, and sustainable supply-chain logistics.

Lesson Plan

- **Warm-Up**
- **Media & Critical Analysis**
- **Grammar in Context**
- **(TOEIC Workplace Application**
- **DDRS Case Discussion**
- **Consolidating Game** Taboo
- **Debrief**

Objectives

By the end of this session, students will be able to:

Analyze Multi-Modal Transport (DDRS): Evaluate infrastructure trade-offs along a 600 km corridor using life-cycle emissions, land take, and territorial equity.

Express Cause, Effect & Proportionality: Accurately apply formal prepositions (*owing to*, *as a consequence of*) and double comparatives (*The + comparative..., the + comparative...*) in B2/C1 technical reports.

Master TOEIC Workplace Strategies: Identify high-frequency transport collocations and correlative inversions (*No sooner... than*) under timed reading conditions.

Resolve Real-World Mobility Dilemmas: Audit corporate travel routes and formulate actionable modal-shift recommendations.

Track Formative Evaluation (FE) Readiness: Demonstrate fluency through targeted circumlocution games and log self-study targets for the upcoming FE assessment.

Integrate DD&RS Principles into Professional Travel: Connect global travel scenarios to concepts of sustainable mobility, cultural respect, and responsible tourism.

Prepare for the Class 5 Formative Evaluation (FE): Understand the exact assessment criteria - vocabulary, fluency, grammar, and TOEIC-readiness - or the upcoming 30-minute graded speaking activity that determines their "Go / No-Go" status.

Session 2 Part 1 Introduction

Activity 1: The "Timeline Clash" (Pairs)

Look at the four historical inflection points in passenger and cargo transport below. With your partner, discuss:

What major economic advantage did this shift bring?

What environmental or societal cost followed?

Phase A: 1830s–1900s - Expansion of steam railways replacing canal barges and horse-drawn freight.

Phase B: 1950s–1970s - Commercial jet aviation and personal automobile ownership booming post-WWII.

Phase C: 1980s–2000s - Containerisation and ultra-cheap, long-haul air / shipping.

Phase D: Present–2030+ — Fleet electrification, SAF (Sustainable Aviation Fuels), hydrogen trials, and active travel corridors.

In small groups (3/4) your teacher will assign one of these phases to each group.

Prepare a short summary presentation for the rest of the class detailing the key developments in your phase. Can you find some interesting vocabulary to present to the rest of the group giving the correct pronunciation and definition?

2. Media Source & Critical Analysis

Media Discussion Points

Focus: Short briefing on *Reshaping the European Transport Network." Look at the following site in pairs and discusss what the impact will be on reducing the number of people who travel by air / road. Is this a viable plan?*

https://transport.ec.europa.eu/transport-modes/rail/high-speed-rail-plan_en

(link available on campus under additional materials)

Active Information-Seeking Task: "The Multi-Modal Pitch"

Split your group into teams:

Team Rail/Active Infrastructure: Argue for public rail infrastructure investment, night trains, and downtown hubs.

Team Next-Gen Aviation/E-Mobility: Argue for electric regional turboprops, zero-emission point-to-point connections, and decentralized industrial hubs.

Guiding DDRS Criteria to address in your pitch:

Total life-cycle carbon footprint (infrastructure construction vs. operational fuel).

Land take, noise pollution, and impact on local biodiversity.

Economic accessibility and equity for rural vs. urban host communities.

Grammar Point: Expressing Cause, Effect, & Complex Comparison

To analyse trends effectively in both academic reports and DDRS analyses, replace basic connectors (*because*, *so*) with **prepositional phrases of cause/result** and **double comparatives**.

Core Formulations:

Cause & Result Prepositions:

Due to / Owing to / On account of + **Noun Phrase / Gerund** (indicates origin/cause)

As a consequence of / Resulting from + **Noun Phrase**

Led to / Brought about / Resulted in + **Noun Phrase** (active verbs of consequence)

Rule: Never use *due to* or *owing to* directly followed by a full subject-verb clause unless combined with *the fact that* (e.g., *owing to the fact that emissions rose...*).

Proportional Change (Double Comparatives):

The + [comparative adjective/adverb], the + [comparative adjective/adverb]

Example: **The heavier** the battery pack installed on regional aircraft, **the lower** the net payload capacity becomes.

Example: **The more efficiently** cities coordinate rail-air transit hubs, **the less** passengers rely on short-haul domestic flights.

Exercise 3.1: Sentence Reconstruction

Rewrite the following notes into single, professional B2/C1 sentences using the prompt in brackets.

Jet fuel was cheap in the 1960s. Airlines expanded intercontinental routes rapidly. *(Brought about)*

> **Answer**: The low cost of commercial jet fuel in the 1960s **brought about** the rapid expansion of intercontinental air routes.

Governments are subsidizing high-speed rail lines. Domestic flights under 2.5 hours are declining. *(As a consequence of)*

> **Answer**: Short-haul domestic flights are declining **as a consequence of** government subsidies for high-speed rail networks.

We delay sustainable fleet renewal. Operational maintenance costs will climb much higher. *(The more... the...)*

> **Answer**: **The longer** we delay sustainable fleet renewal, **the higher** operational maintenance costs will climb.

Battery energy density is currently limited. Commercial electric planes cannot service long-haul routes. *(Owing to)*

> **Answer**: Commercial electric planes cannot service long-haul routes **owing to** current limitations in battery energy density (or: *owing to limited battery energy density*).

4. TOEIC Workplace Check (20 Minutes)

Aligning with your self-study logs, this section exercises reading speed and collocation identification in **Part 5 (Incomplete Sentences)** and **Part 7 (Logistics & Transport Memorandum)**.

TOEIC Part 5 Practice: Collocations & Prepositions in Transport

To drastically reduce transit delays, the freight department decided to _____ the transport of urgent parts by switching to electric rail cargo.

(A) accelerate

(B) accelerating

(C) acceleration

(D) accelerated

Answer: **(A)**. The infinitive marker *to* requires a base verb (*to accelerate*), mirroring common TOEIC purpose clauses.

The regional transit authority announced that ticket revenues rose sharply, largely _____ the introduction of an integrated digital pass.

(A) on account

(B) owing to

(C) in spite of

(D) because

Answer: **(B)**. *Owing to* is correctly followed by the noun phrase (*the introduction...*). *(A)* lacks *of*, *(D)*requires a subject + verb clause.

_____ had the new high-speed rail line opened to the public than passenger traffic on the parallel highway dropped by 25%.

(A) Rarely

(B) No sooner

(C) Hardly

(D) Barely

Answer: **(B)**. The correlative pair is **No sooner ... than**. (*Hardly/Scarcely* pairs with *when*).

Airlines seeking eco-label certification must prove substantial reductions in greenhouse gas _____ across their supply chain.

(A) emissions

(B) submissions

(C) admissions

(D) omissions

Answer: **(A)**. High-frequency CSR/DDRS collocation: *greenhouse gas emissions*.

Case Discussion: the Decarbonisation Dilemma

Scenario: The ENAC Transit Audit

Your working group has been tasked with auditing business travel for an international aviation consultancy:

Current situation: Staff routinely book short 50-minute domestic flights between regional branches to save time.

The Conflict: Total door-to-door transit time by TGV is 3 hours 15 minutes, but flying produces roughly 6 to 8 times more carbon emissions per passenger-kilometer.

Task (Spoken Output): Formulate two policy recommendations for the company travel policy. Incorporate at least one **expression of cause/consequence**.

End-of-Class Word Game: Taboo

Game Rules:

Two teams (Team A vs. Team B).

One volunteer stands with their back to the board (or faces away from the screen/handout).

The teacher points to a target term and its three **Forbidden ("Taboo") Words**.

The team has **45 seconds** to explain the concept to their teammate using accurate English definitions and examples.

Constraint: If anyone says any of the forbidden words (or variations of the root), that round scores zero!

Round 1 (Team A)

Target Term: MODAL SHIFT

Forbidden Words:

Train

Change

Car

(Definition hint: Moving passenger or freight travel from high-polluting methods to greener transport networks).

Round 2 (Team B)

Target Term: CARBON FOOTPRINT

Forbidden Words:

Emissions

Gas

Calculate

(Definition hint: The total amount of greenhouse impact produced directly and indirectly by human activities or travel).

Round 3 (Team A)

Target Term: **HIGH-SPEED RAIL**

Forbidden Words:

Fast

TGV

Track

(Definition hint: An electrified ground transit network operating specialized rolling stock well above conventional velocity limits).

Round 4 (Team B)

Target Term: **LIFECYCLE**

Forbidden Words:

Build

End

Recycle

(Definition hint: Assessing the environmental footprint of an aircraft or vehicle from raw resource extraction all the way to decommissioning).

Round 5 (Sudden Death / Open Floor)

Target Term: **SUSTAINABLE AVIATION FUEL (SAF)**

Forbidden Words:

Kerosene

Bio

Oil

(Definition hint: Non-petroleum drop-in power source derived from waste or synthetic origins to power turbine engines).

Class Debrief & Personal Takeaways

Take 3 minutes to complete this section before you leave.

1. Key Learnings & Review

In one sentence, what was the most important thing you learned today?

_____
_____

2. Future Application (Connecting to your FE / Career)

How will you apply today's vocabulary, grammar, or travel/tourism concepts to your (FE)?

_____
_____

3. Action Plan & Next Steps

What specific homework or preparation do you need to complete before our next session?

_____
_____

4. Questions & Clarifications

Do you have any lingering questions for your teacher about today's material?

_____
_____

MODULE 1

TRAVEL TRANSPORT & LEISURE

SESSION 3: OVERTOURISM

Session 3: Overtourism

DDRS: Areas Covered

DDRS Definition: Le Référentiel National DD&RS de l'Enseignement Supérieur et de la Recherche (Label DD&RS) structure les engagements écologiques, sociétaux et éthiques des établissements et des grands projets de transport selon 5 axes stratégiques et leurs domaines transversaux d'application.

Environmental Responsibility (Empreinte Carbone & Écosystèmes Fragiles): Footprint calculation and ecological carrying capacity; degradation of natural reserves, soil compaction, and severe water/waste stress generated by visitor spikes versus local baselines.

Social Equity & Territorial Cohesion (Justice Spatiale & Préservation des Communautés): Displacement of permanent residents through short-term holiday rental proliferation (*Airbnb-ification*); preservation of living heritage versus monoculture theme-park dynamics.

Economic Viability & Ethics (Gouvernance Résiliente & Régulation Publique): Shift from volume-based tourism metrics (gross arrival headcounts) to value-retention and de-growth indicators; implementation of municipal entry levies, dynamic flight-slot caps, and regulatory zoning.

Objectives

By the end of this session, students will be able to:

By the end of this lesson, you will be able to:

Use key overtourism terms (Vocabulary): Accurately define and use essential terms related to mass tourism (such as tourist levy, carrying capacity, resident footfall, de-marketing, and aquifer depletion) in spoken discussion and written notes.

Describe overtourism issues(Fluency & Circumlocution): Explain difficult tourism concepts spontaneously under time pressure using synonyms, examples, and descriptions when you cannot recall the exact technical term.

Explain city regulations using causatives (Grammar Accuracy): Correctly use active and passive causative structures (e.g., "The city had the cruise terminal relocated" or "Officials made tour operators adjust their schedules") to explain municipal rules and enforcement.

Balance arguments using concession linkers (Grammar Accuracy): Construct formal sentences that balance economic benefits against local environmental damage using prepositions of concession (in spite of, despite, and notwithstanding).

Pronounce multi-syllable tourism words clearly (Pronunciation): Accurately place stress on the correct syllable and pronounce vowel sounds clearly in commonly mispronounced policy words (such as reg-u-la-to-ry, sat-u-ra-tion, sus-tain-a-ble, and ca-pa-ci-ty).

Defend stakeholder solutions in a group debate (Fluency & Interaction): Participate in a role-play discussion balancing local jobs with destination protection, defending your point of view and responding to opposing opinions smoothly.

Spot common grammar traps in business contexts (TOEIC & Grammar Correction): Identify and explain tricky grammar distractors (especially causative verbs and contrast words) in TOEIC Parts 5 & 6 practice questions, logging recurring errors to avoid them on the exam.

Lesson Plan

Warm-Up & Rapid Retrieval (15 min): "The Saturation Index" - Pair analysis of tourist-to-resident footfall ratios across benchmark destinations (Venice, Dubrovnik, Maya Bay) to identify ecological and social carrying capacity thresholds.

Media & Critical Analysis (25 min): "The Regulatory Backlash Pitch" - debate evaluating municipal countermeasures against mass tourism (Venice entry levies, cruise ship basin bans, Amsterdam's "Stay Away" campaign).

Grammar in Context (20 min): Causatives & Complex Concession - Structuring formal policies with active/passive causatives (had the terminal relocated, made operators adjust) and prepositions of concession (notwithstanding, in spite of).

TOEIC (20 min): Parts 5 & 6 Error Logging - Incomplete sentence drilling.

DDRS Case Discussion (15 min): "The Municipal De-Growth Audit" - Stakeholder dilemma balancing island airport capacity, seasonal employment, and acute local aquifer depletion.

Consolidating Game (15 min): "The Taboo Carrying Capacity" - Rapid circumlocution drill featuring essential lexis (tourist levy, spatial saturation, de-marketing, seasonal tapering, cruise basin ban).

Debrief (10 min): Brief Entry & FE Check - Formative Evaluation (FE) continuous assessment logging and learning portfolio.

Session 3 Part 1: Warm-Up & Rapid Retrieval

"The Saturation Index"

Instructions for Students: Look at the benchmark destination data cards below with your partner.

- **Tourist-to-Resident Ratio:** How many annual visitors arrive for every 1 permanent resident living there.
- **Carrying Capacity:** The maximum number of visitors a place can accept before nature suffers or local residents cannot live comfortably.

Discuss these two questions:

- Which destination faces the biggest risk to its local culture, and which faces the biggest threat to its natural environment?
- At what point does a destination cross the line from "thriving local economy" to "unlivable city"?

Benchmark Destination Data Cards

Card A: Venice (Italy)

- **Permanent Residents:** ~49,000
- **Annual Visitors:** ~20,000,000
- **Ratio:** ~400 visitors per 1 resident
- **Main Issues:** Housing shortages, high grocery prices, historic canal wear

Card B: Dubrovnik (Croatia)

- **Old Town Residents:** ~1,200
- **Annual Visitors:** ~1,200,000
- **Ratio:** ~1,000 visitors per 1 Old Town resident
- **Main Issues:** Extreme summer pedestrian traffic jams, cruise ship overcrowding

Card C: Maya Bay (Thailand)

- **Permanent Residents:** 0 (uninhabited protected island cove)
- **Peak Visitors:** ~5,000 per day (in an area the size of two football pitches)
- **Main Issues:** Blacktip reef shark habitat loss, destroyed coral reefs

Session 2 Part 2: Media & Critical Analysis

"The Regulatory Backlash Pitch"

Instructions for Students: Cities around the world are taking action against mass tourism. In your group:

- Select **one** policy below to pitch to your local mayor as the most effective solution.
- Anticipate **two criticisms** from local business owners or travelers and prepare your counterarguments.

- **Policy 1: The Day-Tripper Entry Fee (Venice)**
    - *What it does:* Tourists visiting only for the day must register online and pay a €5 entry fee on peak weekends. Overnight hotel guests do not pay (they already pay a local hotel room tax).
    - *Goal:* Discourage quick visits that create heavy crowd congestion while contributing very little money to local shops.
- **Policy 2: The Giant Ship Basin Ban (Venice / Santorini)**
    - *What it does:* Prohibits large cruise ships over a certain weight from entering central historic water channels, forcing them to dock at an industrial port far away.
    - *Goal:* Protect historic building foundations and prevent thousands of passengers from arriving in narrow alleys all at the exact same hour.
- **Policy 3: Targeted "De-Marketing" Campaigns (Amsterdam)**
    - *What it does:* Targeted online search ads warn prospective party tourists: "Stay Away – disruptive behavior will lead to heavy fines and arrest."
    - *Goal:* Discourage disruptive party tourism and encourage cultural, respectful travelers instead.

Session 3 Part 3: Grammar in Context

Causatives & Complex Concession in City Policy

Part A: Causatives (Making Others Act / Arranging Action)

In formal policy and administrative management, city leaders rarely carry out technical tasks directly. Instead, they require, order, or arrange actions:

- **Active Causative (Focus on who performs the action):**
  - make + someone + base verb (mandatory rule): *"The council **made cruise operators adjust** their arrival schedules."*
  - have + someone + base verb (business instruction / delegation): *"The city **had independent auditors evaluate** the crowd levels."*
  - get + someone + to + verb (persuasion / incentive): *"We must **get hotel owners to share** real-time booking numbers."*
- **Passive Causative (Focus on the object/result):**
  - have / get + object + past participle: *"The mayor **had the terminal relocated** away from the historic center."*

Part B: Prepositions of Concession

Use these prepositions to introduce contrasting facts or show that a policy succeeds despite obstacles:

- **Despite / In spite of + noun phrase / -ing form:**
  - *"**In spite of** heavy opposition from budget airlines, the visitor tax was approved."*
  - *"**Despite** losing short-term revenue, the city protected its water supply."*
- **Notwithstanding + noun phrase (Formal / Legal register):**
  - *"**Notwithstanding** complaints from souvenir shops, the pedestrian zone remains closed to traffic."*

Practice Drills (Individual - Pair Check)

Rewrite the sentences below using the word in brackets:

- The government forced hotels to report their true occupancy rates. (MADE)
  _____
- The city council hired an engineering firm to inspect the bridges. (HAD - passive form)
  The city council _____
- Even though tourism brings in significant tax revenue, the village cannot handle more traffic. (IN SPITE OF)
  _____
- Although business owners raised formal complaints, the bus terminal was moved outside town. (NOTWITHSTANDING)
  _____

Answers

- *The government **made hotels report** their true occupancy rates.*
- *The city council **had the bridges inspected** (by an engineering firm).*
- ***In spite of significant tax revenue from tourism**, the village cannot handle more traffic.*
  (Alternative: *In spite of tourism bringing in significant tax revenue...*)
- ***Notwithstanding formal complaints from business owners**, the bus terminal was moved outside town.*

Session 3 Part : TOEIC Practice & Error Logging

Reading Parts 5 & 6: Municipal Tourism Management

Part 5: Incomplete Sentences

1. _____ strong objections from regional tour operators, the municipal council enacted the weekend congestion fee.

(A) In spite

(B) Notwithstanding

(C) Although

(D) Even

2. The port authority had the international docking slip _____ during the low season to accommodate newer environmental vessels.

(A) modernize

(B) modernizing

(C) modernized

(D) modernizes

3. In an effort to curb overcrowding in the village center, the board made bus drivers _____ passengers outside the perimeter.

(A) to drop off

(B) dropped off

(C) drop off

(D) dropping off

4. _____ the steep decline in summer visitors, local restaurants reported stable profits thanks to domestic weekend trade.

(A) Despite

(B) Even though

(C) Whereas

(D) Because

Part 6: Text Completion

Questions 5–7 refer to the following official notice.

To: All Licensed Accommodation Providers
From: City Tourism Directorate
Subject: Implementation of Summer Guest Quotas

Starting June 1, the municipal council will introduce new daily visitor limits.
Recent reports revealed that neighborhood water reserves reached historic lows last August.

5. [ ] severe pressure on urban resources, the previous council delayed action.
(A) Due to
(B) In spite of
(C) Provided that
(D) Because of

However, the current administration has already had all short-term rental permits 6. [ ]
to ensure fair compliance across districts.

(A) audit
(B) auditing
(C) audited
(D) to audit

7. [ ]
(A) We hope this attracts millions of additional party travelers this summer.
(B) We appreciate your cooperation as we work toward long-term municipal balance.
(C) Cruise liners will now receive unlimited access to inner harbor docks.
(D) The port will permanently close to all commercial transport next week.
Error Log Sheet (TOEIC)

Teacher Key & Explanations (Handout 4):

- **1. (B) Notwithstanding.** A noun phrase follows (strong objections...). *(A)* lacks of (in spite of). *(C)* and *(D)* require a complete clause with a conjugated subject and verb.
- **2. (C) modernized.** Passive causative formula: have + something (the docking slip) + past participle (modernized).
- **3. (C) drop off.** Active causative formula: make + someone (bus drivers) + bare infinitive (drop off). Never use to.
- **4. (A) Despite.** Directly precedes a noun phrase (the steep decline...). *(B)* and *(C)* need subject + verb clauses. *(D)* produces an illogical meaning.
- **5. (B) In spite of.** Establishes concession (In spite of severe pressure... delayed action). *(A)* and *(D)*indicate causation, which does not fit delaying urgent action.
- **6. (C) audited.** Passive causative: had + short-term rental permits (object) + audited (past participle).
- **7. (B)** Provides the standard, courteous administrative closing for a municipal policy announcement.

Session 3 Part 5 Case Discussion

"The Municipal De-Growth Audit: Isla Serena"

Scenario Brief

Isla Serena is a picturesque Mediterranean island.

- **The Conflict:** During July and August, local water demand surges by 320%. The island's fresh underground water reserves (aquifers) are running dry, which causes salty sea water to enter agricultural wells.
- **The Dilemma:** Expanding the airport runway will bring year-round budget flights and 1,500 new seasonal hospitality jobs. Canceling the expansion and capping summer flights will save the water supply, but seasonal youth employment will plunge.

Role Cards (Form Groups of 4)

Role 1: The Town Mayor

- **Primary Goal:** Public budgets and social peace.
- **Stance:** You need tourism tax revenue to repair local roads and schools, but you cannot allow residents to run out of running tap water in August. You want a middle ground (such as a water surcharge on luxury resorts and a sensible cap on budget flights).

Role 2: The Island Hotel Association President

- **Primary Goal:** Business revenue and return on investment.
- **Stance:** The airport expansion must continue. Many local families earn their entire yearly income during this 90-day summer window. You argue that the city should build a modern seawater desalination plant instead of restricting tourist numbers.

Role 3: The Local Organic Farmer & Well Owner

- **Primary Goal:** Basic survival resources and agricultural heritage.
- **Stance:** Ground water is turning salty, ruining your lemon and olive groves. Tourism cannot destroy basic drinking water. You demand a 30% reduction in hotel rooms and an immediate ban on all new swimming pools.

Role 4: The Environmental Regulator

- **Primary Goal:** Ecological balance and environmental health.
- **Stance:** You advocate for a strict "De-Growth" plan. The island has clearly exceeded its natural carrying capacity. You propose reducing summer flight slots, banning cruise ships, and shifting the island toward low-impact, off-peak cultural visits.

Discussion Task: Agree on a 3-point municipal policy resolution within 10 minutes. Each proposal must include at least one causative or concession structure (e.g., *"We will make hotels install..."*, *"Notwithstanding revenue losses..."*).

Session 3 - Part 6 Class Debrief & Personal Takeaways

Take 3 minutes to complete this section before you leave.

1. Key Learnings & Review

In one sentence, what was the most important thing you learned today?

_____
_____

2. Future Application (Connecting to your FE / Career)

How will you apply today's vocabulary, grammar, or travel/tourism concepts to your (FE)?

_____
_____

3. Action Plan & Next Steps

What specific homework or preparation do you need to complete before our next session?

_____
_____

4. Questions & Clarifications

Do you have any lingering questions for your teacher about today's material?

_____
_____

Session 4: Ecotourism & Sustainable Destination Design

DDRS: Areas Covered

- **DDRS Definition:** Le Référentiel National DD&RS de l'Enseignement Supérieur et de la Recherche (Label DD&RS) structure les engagements écologiques, sociétaux et éthiques des établissements et des grands projets de transport selon 5 axes stratégiques et leurs domaines transversaux d'application.
- **Environmental Responsibility (Préservation de la Biodiversité & Bas Carbone):** Minimization of ecological footprints; low-impact infrastructure, renewable microgrids, circular waste management, and native biotope restoration funded by visitor revenues.
- **Social Equity & Territorial Cohesion (Inclusion Communautaire & Retombées Locales):** Direct economic empowerment of indigenous and resident populations; safeguarding traditional crafts and fair-wage community-run hospitality versus corporate greenwashing.
- **Economic Viability & Ethics (Éco-Labellisation & Éthique de Gestion):** Transition toward regenerative financing; rigorous third-party certifications (GSTC, Green Globe) and transparent supply chains preventing fraudulent eco-branding.

Objectives

By the end of this session, students will be able to:

- **Use key ecotourism terms (Vocabulary):** Accurately define and use essential sustainability concepts (such as *carbon offset, biodiversity corridor, community-based tourism, greenwashing*, and *rewilding*) in spoken pitches and written notes.
- **Describe ecotourism projects (Fluency & Circumlocution):** Explain complex environmental initiatives spontaneously under time pressure using synonyms, examples, and functional descriptions when technical terms escape recall.
- **Formulate hypothetical initiatives using mixed conditionals (Grammar Accuracy):** Correctly structure mixed conditional sentences (e.g., "*If the reserve had invested in solar pumps earlier, it would not depend on diesel today*") to evaluate past sustainability choices and current ecological realities.
- **Clarify purpose and conditions using formal connectors (Grammar Accuracy):** Construct precise development arguments using compound connectors of purpose and condition (*in order that, provided that, on condition that*, and *so as to*).
- **Pronounce multi-syllable environmental words clearly (Pronunciation):** Accurately place word stress on root syllables and articulate vowel reductions in essential lexis (*bio-di-VER-si-ty, cer-ti-fi-CA-tion, al-TER-na-tive*, and *eco-SYS-tem*).

- **Pitch and defend an ecotourism initiative in pairs or triads (Fluency & Interaction):** Research live data, design a viable micro-project, and present a structured pitch balancing commercial viability with conservation needs.

- **Spot common grammar traps in business contexts (TOEIC & Grammar Correction):** Identify and explain grammatical distractors (specifically conditional clause structures and purpose conjunctions) in TOEIC Parts 5 & 6 items, logging recurring errors for exam tracking.

Lesson Plan (120 Minutes)

- **Warm-Up & Rapid Retrieval (15 min): "The Authenticity Index"**
Pair evaluation of three real-world ecotourism models (Costa Rican rainforest lodge, Kenyan community conservancy, Norwegian electric fjord cruise) to distinguish genuine stewardship from superficial greenwashing.

- **Grammar in Context (20 min): Mixed Conditionals & Connectors of Purpose**
Synthesizing environmental policy decisions: contrasting past conservation mistakes with present outcomes, and setting formal contractual conditions (*provided that, so as to*).

- **TOEIC Practice & Error Logging (20 min): Parts 5 & 6 Drilling**
Timed reading set focusing on conditional inversion, purpose conjunctions, and eco-certification audit notices.

- **Collaborative Project Workshop (30 min): "The Eco-Resort Blueprint"**
Internet-enabled team challenge in pairs or triads: students design an authentic, low-impact tourist experience based on a fragile ecosystem, integrating local governance and zero-waste solutions.

- **Project Pitches & Stakeholder Q&A (15 min): "The Green Investor Forum"**
Rapid 2-minute elevator pitches where peers cross-examine each project on carrying capacity, energy independence, and community revenue sharing.

- **Consolidating Game (10 min): "The Taboo Green Shield"**
Fast-paced lexical circumlocution game reinforcing critical sustainable tourism terminology under time limits.

- **Debrief & FE Check (10 min): Continuous Assessment Log**
Formative Evaluation (FE) logging, personal synthesis, and self-assessment portfolio submission.

Session 4 Part 1: Warm-Up & Rapid Retrieval

"The Authenticity Index"

Instructions for Students: Examine the benchmark ecotourism profiles below with your partner.

- **Economic Retention:** The percentage of every tourist euro/dollar that remains inside the local host economy rather than leaking to international operators.

- **Ecological Additionality:** The measurable positive benefit to local biodiversity created by the tourist venture beyond mere protection.

Discuss these two questions:

1. Which operation shows the highest level of genuine ecological additionality, and which faces the greatest commercial temptation toward greenwashing?

2. What concrete indicator proves that a business is truly practicing community-based tourism rather than using it as a marketing slogan?

Benchmark Ecotourism Data Cards

- **Card A: Lapa Rios Rainforest Lodge (Osa Peninsula, Costa Rica)**
    - Staff: 100% Costa Rican nationals, mostly from surrounding rural hamlets
    - Reserve: 1,000 acres of primary tropical lowland rainforest protected
    - Model: Private eco-reserve financed exclusively through high-end bungalow occupancy
    - Main Focus: Reforestation corridors connecting fragmented national parks; strict zero-single-use-plastic mandate
- **Card B: Il Ngwesi Community Eco-Lodge (Laikipia, Kenya)**
    - Governance: 100% owned and operated by the indigenous Maasai community
    - Revenue Distribution: Direct funding for primary healthcare, local schooling, and anti-poaching security patrols
    - Energy/Waste: 100% off-grid solar power and gravity-fed water harvesting
    - Main Focus: Resolving human-wildlife conflict while preserving nomadic pastoral heritage
- **Card C: Brim Explorer (Tromsø & Lofoten, Norway)**
    - Fleet: Custom-built hybrid-electric catamarans
    - Impact: Silent electric propulsion prevents acoustic pollution for orcas and humpback whales
    - Footprint: Zero-emission hydro-electric charging at municipal docks
    - Main Focus: Scientific hydrophone listening tours coupled with oceanographic microplastic sampling

Session 4 Part 2: Grammar in Context

Mixed Conditionals & Connectors of Purpose/Condition in Eco-Governance

Part A: Mixed Conditionals (Past Cause

↔

↔ Present Result)

In sustainability audits, analysts frequently connect past strategic investment choices to present operational states:

- **Past action →**

  → Present condition:

  - *Formula:* `If + had + past participle, would/could + base verb`
  - "*If the reserve **had secured** legal status ten years ago, it **would not face** illegal logging pressure today.*"

- **Present characteristic →**

  → Past outcome:

  - *Formula:* `If + simple past, would/could + have + past participle`
  - "*If the island **were** truly committed to zero emissions, it **would have installed** solar charging stations years ago.*"

Part B: Connectors of Purpose & Condition

Formal certification audits require exact contractual terminology:

- **Purpose:**
  - `so as to / in order to + base verb`: "*The hotel banned single-use toiletries **so as to minimize** plastic landfill waste.*"
  - `so that / in order that + clause (subject + can/could/may)`: "*The lodge installed greywater systems **in order that** native flora could be irrigated during droughts.*"
- **Condition:**
  - `provided that / on condition that + clause`: "*Operators may access the marine sanctuary, **provided that** their vessels operate on silent electric propulsion.*"

Practice Drills (Individual

→

→ Pair Check)

Rewrite the sentences below using the word in brackets:

1. The developer did not consult local elders, so the park currently encounters fierce community resistance. (HAD)

2. The resort constructed a private desalination unit because it wanted to avoid draining the town's fresh groundwater. (SO AS TO)

3. The operator will receive the green biosphere certification only if it proves that 80% of food ingredients come from local farms. (PROVIDED THAT)

4. The sanctuary is not well funded, which is why it did not hire enough wildlife rangers last season. (WERE)

Answers

- *If the developer had consulted local elders, the park would not encounter fierce community resistance.*

- *The resort constructed a private desalination unit so as to avoid draining the town's fresh groundwater.*

- *The operator will receive the green biosphere certification provided that it proves that 80% of food ingredients come from local farms.*

- *If the sanctuary were better funded, it would have hired enough wildlife rangers last season.*

Session 4 Part 3: TOEIC Practice & Error Logging

Reading Parts 5 & 6: Ecotourism Certification Audits

Part 5: Incomplete Sentences

1. The lodge will be granted full GSTC certification _____ it submits third-party documentation of its greywater filtration efficiency.
   (A) so as to
   (B) provided that
   (C) in order to
   (D) despite of

2. If the national park authority _____ a strict visitor cap last summer, the fragile alpine trails would not be severely eroded right now.
   (A) implemented
   (B) would implement
   (C) had implemented
   (D) has implemented

3. The expedition team mapped wildlife migratory corridors with GPS trackers _____ avoid disturbing sensitive breeding grounds.
   (A) so as to
   (B) in order that
   (C) on condition that
   (D) provided

4. If the village _____ an active partner in the conservation trust, it would have received dividend payouts from park permits last month.
   (A) were
   (B) is
   (C) had been
   (D) would be

Part 6: Text Completion

Questions 5–7 refer to the following official audit report.

To: Board of Directors, Kielder Forest Eco-Resort

From: Global Sustainable Tourism Council (GSTC) Auditor

Subject: Annual Recertification Status

Your recent recertification application has been processed.

The audit team confirmed that your facility redirected 92% of operational food waste into commercial composters.

5. [ ] preserve native bird nesting patterns, all perimeter lighting must be reduced after 21:00.
   (A) Provided that
   (B) In order to
   (C) In spite
   (D) On condition that

If your operations team 6. [ ] all diesel back-up generators with micro-hydro turbines during the 2024 overhaul, the site would already boast carbon-neutral status today.

(A) replaced

(B) replaces

(C) had replaced

(D) would replace

7. [ ]
   (A) Please clear these outstanding remediation actions within thirty days to retain your Gold rating.
   (B) Unrestricted coach access will resume along primary nature trails tomorrow morning.
   (C) We recommend expanding the parking lot to accommodate high-volume bus arrivals.
   (D) Single-use plastic water bottles are now mandatory across all guest chalets.

Error Log Sheet (TOEIC)

Question #	Question Type / Target Grammar	Why I Made the Mistake (Root Cause)	Rule to Remember / Correct Pattern
Q1	Conditional Conjunction	Confused preposition of purpose with condition	*Provided that* + complete clause (subject + verb)
Q2	Mixed Conditional (Past →Present)	Selected simple past instead of past perfect	`If` + **had + V3** (past action) → `would` + **V1**(present state)
Q3	Purpose Connector	Selected clause connector before an infinitive	*So as to* / *In order to* + **Bare Verb**
Q4	Mixed Conditional (Present → Past)	Confused standard 2nd with mixed conditional	`If` + **were** (ongoing state) → `would have` + **V3** (past event)
Q5	Purpose Connector	Selected a conditional conjunction	Use *In order to* + base verb to show deliberate aim
Q6	Mixed Conditional	Chose simple past for past action	Audit condition: *had replaced* in 2024
Q7	Text Coherence / Tone	Overlooked context of an official audit warning	Formal audit notices close with remediation deadlines

Teacher Key & Explanations (Handout 4)

- **1. (B) provided that:** A full clause (*it submits*...) follows; establishes a mandatory condition. *(A)* and *(C)* take infinitives. *(D)* is ungrammatical (*in spite of*).
- **2. (C) had implemented:** Mixed conditional expressing a past action (*last summer*) impacting the present state (*right now*).
- **3. (A) so as to:** Followed directly by a base verb (*avoid*). *(B)* requires a full clause (*in order that they could avoid*).
- **4. (A) were:** Mixed conditional expressing an ongoing general status (*If the village were an active partner*) leading to a past result (*would have received*).
- **5. (B) In order to:** Followed by a base infinitive (*preserve*) indicating policy intention.
- **6. (C) had replaced:** Mixed conditional: past event (*during the 2024 overhaul*) connected to current state (*would already boast... today*).
- **7. (A):** Provides the professional audit closure outlining standard corrective compliance.

Session 4 Part 4: Collaborative Project Workshop (30 min)

"The Eco-Resort Blueprint"

Team Structure: Work in pairs or triads. Each team has internet access.

Scenario: You have been awarded a €2,500,000 public-private green endowment to develop an authentic ecotourism project in one fragile ecosystem:

- *Option 1:* A temperate fjord coast facing excessive cruise ship pollution.
- *Option 2:* An arid Mediterranean coastal wetland suffering from real-estate development.

- *Option 3:* An alpine valley threatened by shrinking glaciers and winter mass skiing.

Project Deliverable: Prepare a 2-minute elevator pitch with a 1-page visual schematic outlining:

1. **Low-Impact Design:** Architecture, power generation, and zero-waste handling.
2. **Community Value Retention:** How local people own, govern, or financially profit from the venture.
3. **Biodiversity Additionality:** The specific habitat conservation or rewilding initiative financed by visitor fees.
4. **Target Grammar Integration:** Your spoken pitch must feature at least **one mixed conditional** and **two connectors of purpose or condition** (*provided that, in order that, so as to*).

Session 4 Part 5: Project Pitches & Stakeholder Q&A (15 min)

"The Green Investor Forum"

- Each group delivers their **2-minute pitch**.
- Peer groups act as the **DDRS Investment Board**, asking one challenging question:
  - "*How do you guarantee that this will not cause severe wildlife disturbance?*"
  - "*What mechanisms prevent foreign tour companies from taking the profits?*"
- Peer assessment focuses on technical feasibility, community ethics, and accurate use of target connectors.

Session 4 Part 6: Consolidating Game (10 min)

"The Taboo Green Shield"

Game Rules: One student describes the term without using the five forbidden taboo words. The partner or team must guess the term within 45 seconds.

- **Card 1: Greenwashing**
  Forbidden words: Fake, Lie, Eco, Marketing, Deceive
- **Card 2: Biodiversity Corridor**
  Forbidden words: Animals, Connect, Forest, Cross, Habitat
- **Card 3: Community-Based Tourism**
  Forbidden words: Local, People, Village, Money, Share
- **Card 4: Carbon Offset**
  Forbidden words: Trees, Flight, CO2, Plant, Pay
- **Card 5: Rewilding**
  Forbidden words: Nature, Wolves, Species, Return, Restore

Session 4 Part 7: Class Debrief & Personal Takeaways (10 min)

Take 3 minutes to complete this section before you leave.

1. Key Learnings & Review

In one sentence, what was the most important distinction you learned today between genuine ecotourism and greenwashing?

2. Future Application (Connecting to your FE / Career)

How will you apply today's vocabulary, mixed conditional structures, or sustainability evaluation metrics to your Formative Evaluation (FE) portfolio?

3. Action Plan & Next Steps

What specific homework or preparation do you need to complete before our next session?

4. Questions & Clarifications

Do you have any lingering questions for your teacher about today's material?
